 **GENUINE**  
ROOF SYSTEMS

## About Us

Treasured for their beauty and endurance, genuine slate and handcrafted clay tile roofs have been a hallmark of refinement and distinction on homes, businesses, and public institutions around the world for centuries. However, these materials and installation techniques have traditionally been too expensive—and heavy—to make them achievable on all but the largest estates and establishments. Until now.

Genuine Roof Systems® provide genuine, natural roofing materials with the distinctive, classic aesthetics prized by home and business owners, but without much of the weight associated with these materials. From replacement roofs to new construction, our patented roofing system achieves the same sophisticated look as traditional installations, resulting in dramatic transformations never before attainable due to weight restrictions.

## Replacement or New Construction Projects

Conventionally installed slate or handcrafted clay tile roofs have often been too heavy and cost-prohibitive for most home or business owners. However, the patented Genuine Roof System interlayment eliminates the excess overlapping materials common in those installations, reducing the weight by up to 40%. Our unique system also eliminates the need for hooks, battens, or rails used with other systems. This means that more homes and businesses can achieve the prestigious look they want on both remodeling projects and new construction developments due to our lightened system.

**Why Replace?** Clearly, the appeal of real slate and handcrafted clay tiles is unquestionable, as seen on the finest homes and other structures around the world. If you have considered a slate or handcrafted clay tile replacement roof of your own, but thought that it was unachievable, think again. Our signature system makes these materials attainable on virtually any home, business, or public institution. Where other materials are prone to leaks, damage, or expensive restructuring, Genuine Roof Systems offer real materials that are naturally durable, competitively priced, easy to install, and lighter weight than comparable roofing methods.

SlateTec™  
A GENUINE ROOF SYSTEM

# SlateTec™

Slate roofing is a time-tested symbol of prestige and grace. Some of the many benefits of quality slate roofs include its craftsmanship, performance, and natural environmental friendliness.

SlateTec® by Genuine Roof Systems offers an alternative to traditional roofing methods, such as standard slate installs, cedar shake, or synthetics for both replacement and new construction projects. Constructed from genuine natural stone, SlateTec achieves the identical look as conventionally installed slate, but without the extra weight.

The proprietary Genuine Roof Systems interlayment is designed to project your investment against weather and UV deterioration for 100 years when combined with our slate.

Our team will work with you to choose from the many slate colors and textures to create the ideal design for your particular project. Please see our website for more details.

## Benefits & Testing

- Less than six lbs. per sq. ft.
- Lower engineering and structural costs
- Genuine Roof Systems sells and ships direct to end users (*no middle man*)
- 100 year warranty from Genuine Roof Systems

**TileTec™**  
A GENUINE ROOF SYSTEM

# TileTec™

Used in Europe and around the world for hundreds of years, English Shingle Tile is revered for its natural, artisanal beauty, longevity, limited maintenance, and environmental friendliness.

TileTec® by Genuine Roof Systems delivers the identical classic flat slab handcrafted clay tile aesthetics without the weight associated with these materials. Our patented system allows our handcrafted clay tile roofs to be installed on almost any weight-challenged roofing project possible.

Let our team show you the variety of our clay tile blends to design the roof of your dreams.

## Benefits & Testing

- Less than nine lbs. per sq. ft.
- Lower engineering and structural costs
- Large variety of colors and textures
- Genuine Roof Systems sells and ships to end user (*no middle man*)
- Backed by an impressive warranty for the first 75 years

### STM 1167 Grade 1:

- Transverse Breaking Strength and Water Absorption

### WIND & RAIN:

- TAS 100 A: Passed
- 110 MPH Wind/Rain (Dade County Protocol)

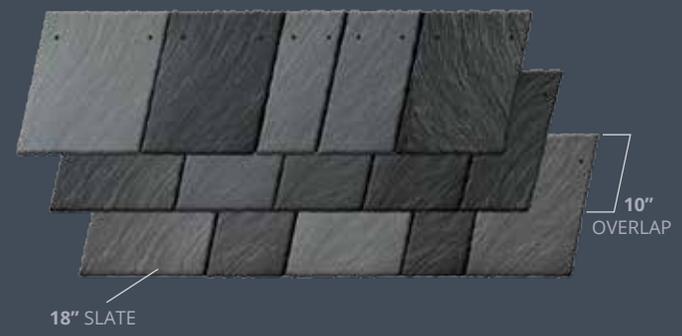

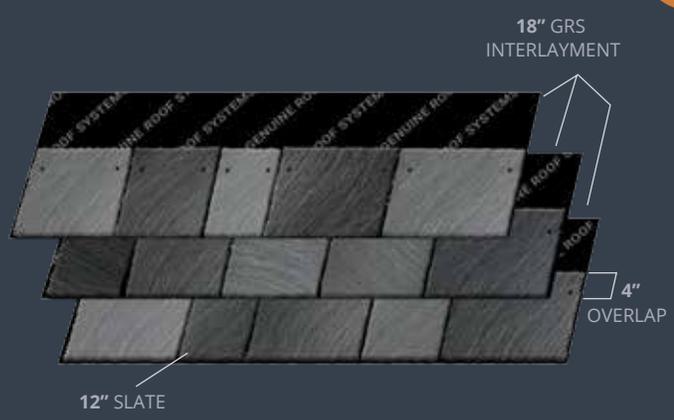

40% LESS MATERIAL!

## Our Products & System

## Traditional Systems

**UNDER 6 LBS. / SQ. FT.**

Same genuine quarried slate (shorter length) with our patented interlayment

**OVER 10 LBS. / SQ. FT.**

Old-style, long, and cumbersome pieces with 10" overlap

### Revolutionizing the roofing industry, our patented interlayment approach:

- Dramatically reduces the amount of material needed—up to 40% less
- Lowers new construction engineering and structural costs
- Slate can replace cedar or asphalt shingles for reroofing plans, and clay tile is now attainable on most roofs
- Indistinguishable from traditional slate or flat slab clay tile installations, but without the hidden overlapping excess material
- Does not compromise quality; we use only genuine S-1 Vermont slate and natural handcrafted flat slab clay tile
- Backed by impressive warranties (*SlateTec*®: 100 years, *TileTec*®: the first 75 years)

# Architects & Contractors

As an architect, roofer, or contractor, you strive to offer only the best designs and materials to your clients.

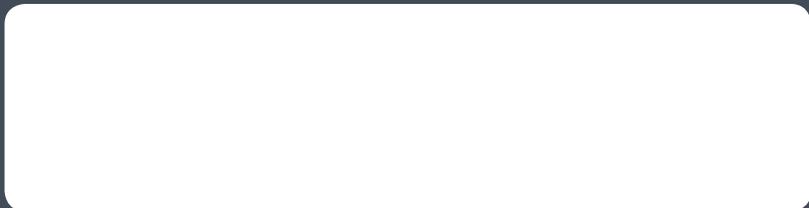

Genuine Roof Systems is proud to offer our unique system that enables professionals like you to expand your new construction and remodeling markets. At less than 6 lbs. per sq. ft., no reengineering is needed with SlateTec; at less than 9 lbs. per sq. ft., TileTec will require an engineer's report and may or may not need minor restructuring.

Our signature interlayment enables you to offer these elegant, reliable genuine materials without the added weight and expenses of traditional installations, and:

- **Eliminates up to 40% of the excess materials** hidden in conventional installs
- **Does not require hooks, battens, or rail systems** common with other methods
- **Uses traditional nail** to the deck system
- **Uses genuine S-1 grade Vermont slate or handcrafted flat slab clay tile** backed by our remarkable warranties
- **Avoids middleman mark up** by shipping directly to the end user
